

POSTER FRAME ASSEMBLY

CONTENT

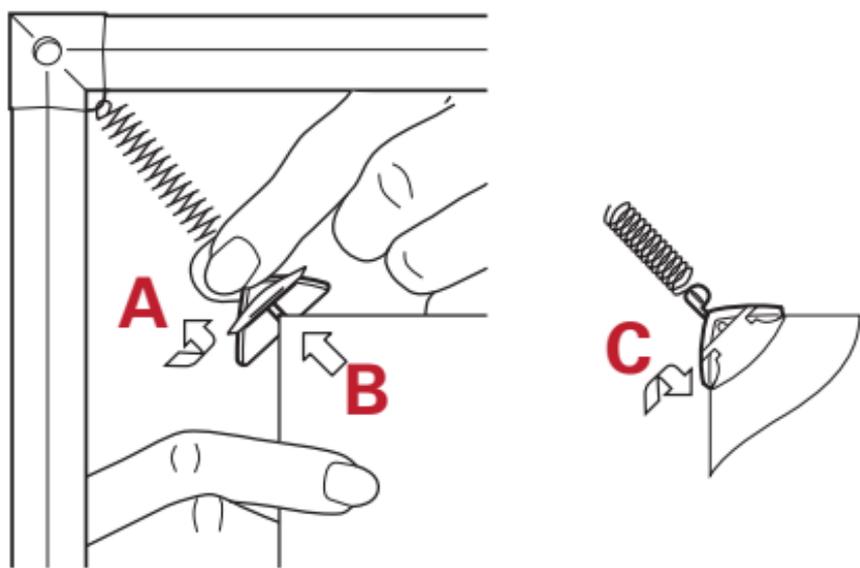

STEP 1 ASSEMBLING THE FRAME

Connect a short tube with pre-installed corners, with a long tube. Repeat with the other side.

STEP 2 USING POSTER CLIPS

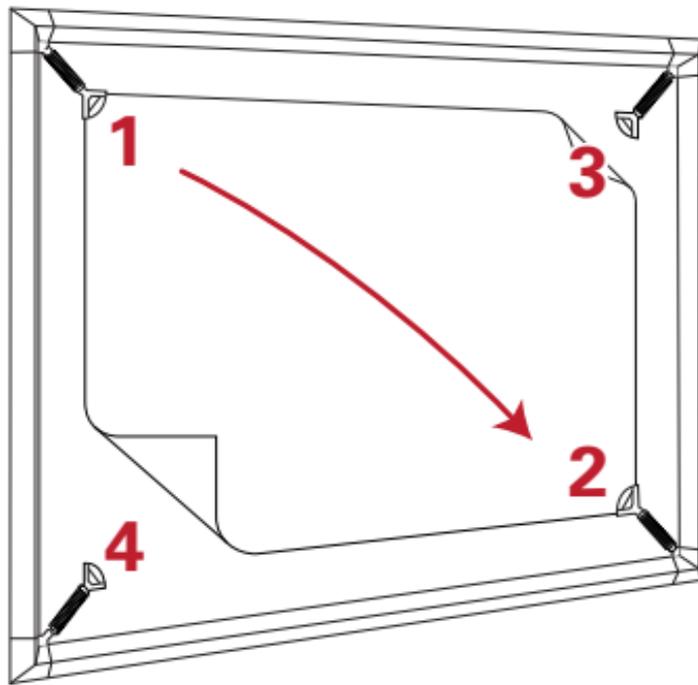

- A** Lift the poster clip to a **full 90° position**.
- B** Slide the corner of the poster into the clip.
- C** Push the upright tab down to secure the poster.

STEP 3 INSTALLING A POSTER

Follow these steps to attach the four poster corners:

- 1** Attach the first corner.
- 2** Attach the opposite corner.
- 3 & 4** Attach the two remaining corners.

OPTIONAL LONG TUBES WITH JUNCTION

For your convenience, tubes of 60" and longer may be split in two equal lengths. Connect them, using the provided junction tubes, to double their length.

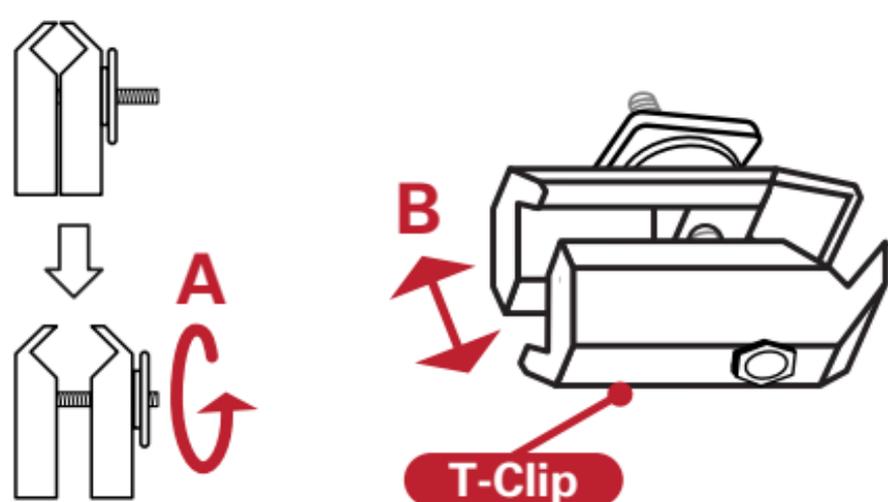

LEG INSTALLATION

CONTENT

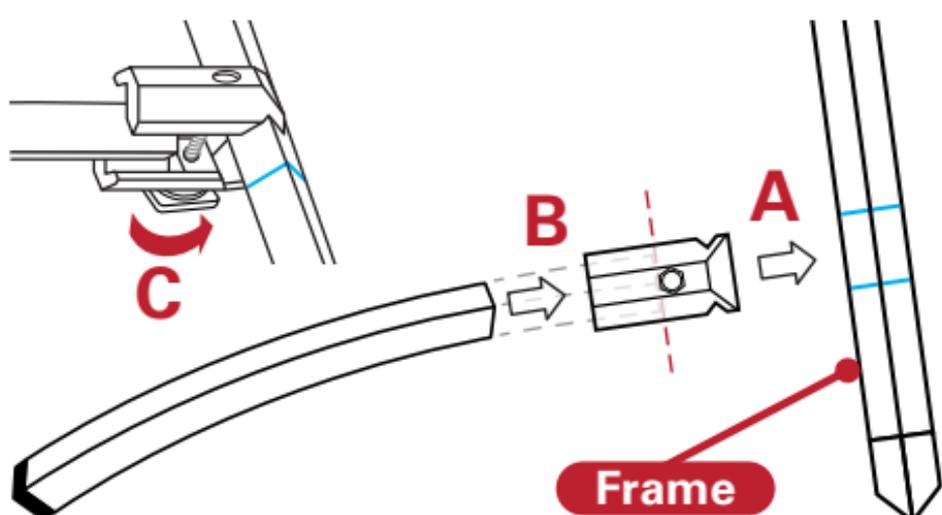

STEP 1 USING A T-CLIP

- A** Rotate the wheelnut counter-clockwise to loosen the T-Clip. Untighten almost all the way.
- B** With your fingers, keep the **T-Clip open**, with the **two parts spread apart** from each other, in preparation for the next step.

STEP 2 CONNECTING THE LEGS

- A** Slide the open T-Clip onto the bottom of the frame. If marks are present, position on the marks.
- B** Slide the leg into the T-Clip **fully, until the end**.
- C** Rotate wheelnut clockwise to tighten the T-Clip.

STEP 3

Repeat with the other leg, positioning it at an equal height. Position the frame on a flat surface to test the legs height adjustment. Adjust as needed.

OPTIONAL ADJUSTING THE TILT

Moving the leg's T-Clips up or down will allow you to change the frame's tilt.
